PRICE CHANGE UPDATE

Dear Valued Partner,

Please note that CK Worldwide will be postponing this year's pricing change to now take effect on June 1, 2024. We expect that most products will see a price increase in the range of 6% with a few exceptions.

With the erratic fluctuations and instability in the market during the past three years we've been able to hold our pricing relative to inflation through efficiency in domestic production and negotiated pricing with our suppliers. This price change is necessary with the escalation in raw material costs, freight and labor.

We plan to hold pricing on the following products:

- MT375 AC/DC TIG Machine with WC375 Water Cooler and Cart
- MT200 AC/DC TIG Machine
- Cold Wire Feed Systems
- TS10 Tungsten Grinders

Two products to note, ceramic lava nozzles and hard plastic insulated torch bodies will no longer be available once current inventory is depleted.

Please also note that pricing on purge chambers will be as quoted at time of ordering due to fluctuations in material costs and components.

Our mission will be to continue providing the highest quality, widest range, competitively priced and most innovative TIG products available in the market today.

We will not have a mailing of price books, however the electronic price files will be made available prior to the June 1, 2024 increase. We will do our best to provide the price files as soon as possible. You may email ck@ckworldwide.com to request the file, or simply call 1-800-426-0877 and we will place you on the list to receive the price files once available.

We appreciate your business.
Best regards,

Jeff Sharpe
President
CK Worldwide, Inc.
